17 that includes an anchor

FFTRACK 44 base is secured to the floor

Industrial carpet application (beside wall/seat)

LLEPM

(Low-Location Exit Path Markings)

FFTRACK 50

FFTRACK 59

FFTRACK 16

INPS has worked closely with many mass transit car builders and transit authorities to design, engineer and manufacture LLEPM systems that work both functionally and financially.

Lighting the way to safety

LLEPM is mandatory on all passenger rolling stock related by the Federal Railroad Administration (FRA) and has become mandatory on all equipment operating under the self-regulating guidelines of American Public Transportation Association (APTA). It is part of the Emergency Preparedness Plans of each transit agency. To minimize cost and increase ease of installation, INPS has developed turnkey solutions that include signage and low-level emergency path illumination products.

We manufacture and supply:

- Glow-in-the-dark safety components
- Emergency exit path markings (exceeds all APTA regulations)
- LED-charged emergency exit path markings
- Complete marking kits for all flooring types
- Transition trims for all flooring types
- Extruded floor mouldings
